

Date: 9/15/2025

Time: 4:30

Location: Zoom

Attendees: Tyson Russell, Allen Peregrino, Walter Scott, Belinda Lin

Agenda:

- Introductions
- Project Background & Motivation
- Background & Related Work
- Project Overview
- Stakeholders & Expectations
- Next Steps & Closing

Key take aways:

- 2 qualtrics surveys
- Send data to python
- First survey personality assessment, PDF report generated
- Second survey Typically monitoring app
- Using generative ai or natural language to take into account several factors to group scenarios with similar actions. Also taking into account user written input not just check boxes.
- Swap with Redcap surveys, getting data into python
- Want redcap survey to take in data and put it into python anywhere, python does calculations and created a PDF,
- Test if redcap can put data into python, initial test done by us.
- More complicated sorting algorithm done.
- Getting permission from client and passwords
- Clients sending over previous projects
- *PROOF OF CONCEPT* can redcap send data to python anywhere
- Python anywhere: files, report integration, app/ report generator
- DO NOT EDIT
