

Date: 9/22/2025

Time: 4:30

Location: Zoom

Attendees: Tyson Russell, Allen Peregrino, Walter Scott, Belinda Lin,

Key questions:

- Would it be best to get the GitHub repo access from the professor of the last group?
- No github repo
- Search function on Mindful application does not do anything, should we implement it in any sort of way? Be able to search record for past events (ie. fight with girlfriend)
- For the Mindful application, is the admin user mode implemented and if so ask about obtaining the admin code.
- Not implemented - clinician would like to input into mindful app of assessment.
- Inquire about getting access to Mongo database
- Create account with wsu email and send it to them to get access
- Mongo DB is used to store our data for the web application
 - Walt is the owner of the organization that contains all data
 - The organization name: Washington State University
 - Project name: Project0
 - All that is needed is to create a MongoDB account and have Walt add you as a collaborator/add your user to the project
- When implementing deep language learning/AI, all it needs to do is categorize situation surveys based off the responses within them? Grouping situation based on common words and situations, grouping up to our discretion. Grouping based on psychological equivalency, patterns of thinking and behaving.
- Data sent/exported via Qualtrics API PythonAnywhere app pulls that data, processes it, and uses it for reports,
/home/WSUPsych/PsychClinic-ReportIntegration-Final/app/report_generator/automated_responses.py

Key take aways:

/home/WSUPsych/PsychClinic-ReportIntegration-Final/app/report_generator/automated_responses.py

Adding graphs to report

Qualtrics API sends CSV format
